## **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

## Amendment to the Claims

2. Referring to claim 17, in line 13, replace "preceding instruction" with --preceding instructions--.

\*NOTE: Applicant originally employed the language "preceding instructions" and changed it to "preceding instruction" in order to overcome a 112 rejection (lack of antecedent basis) applied by the examiner. However, after further consideration, the examiner feels that it is grammatically correct to use "preceding instructions", and that it is clear that "instructions" refers to the multiple types of instructions (prefetch, register, and preceding) and not to multiple preceding instructions. Therefore, the 112 rejection is unnecessary when using the language "preceding instructions".

## Reasons For Allowance

3. The following is an examiner's statement of reasons for allowance: Referring to claims 17 and 18, the prior art of record fails to teach or suggest, individually or in combination, all of the disclosed claim limitations in combination, wherein the claimed prefetch instruction is interpreted by the examiner as being an explicit prefetch instruction, i.e., an instruction that is part of the executable instruction set. This is supported by applicant's arguments on page 10 of the remarks filed on August 12, 2004. This especially differs from the Chen reference used in the most recent rejection because although a prefetch operation/instruction is issued in Chen, it is

not an explicit instruction executed by executable circuitry. Instead, only the program counter (PC) and a prediction table are used to perform a prefetch. See section B and Fig.2 on page 612. That is, a prefetch instruction from an instruction set is not executed. Instead, when the PC corresponds to a load instruction, a prefetch is generated by applying the PC to the prediction table. This is further made apparent by Fig.4 on page 614, where it can be seen that the prediction table is not a part of the execution unit.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

## Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David J. Huisman whose telephone number is (703) 305-7811. The examiner can normally be reached on Monday-Friday (8:00-4:30).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Eddie Chan can be reached on (703) 305-9712. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
